To Whom it May Concern,

October 29, 2019

I'm writing to recommend Bryan Jenkins for any finishing needs you may have.

I became acquainted with Bryan in May of 2017. My company had been awarded a contract with the University of North Georgia to remodel the great room in a building known as Hoag Student Center. The project required a great deal of wood millwork and almost all the finishes were to be stained, sealed and lacquered.

I was very concerned that whoever we subcontracted the finish work to, must be an expert with the stain and lacquer process. We would have over \$40,000.00 invested in Maple plywood and custom Maple millwork and another \$40,000.00 in installation. I knew the average, run of the mill, house painter would not do justice to the quality of the millwork we were installing. Moreover, I knew that someone without the proper expertise could easily ruin the work we had so meticulously installed.

Bryan and his team delivered a beautiful finish on time and in budget. Based on our experience with him I can confidently recommend him for any type finish work you may need.

Sincerely,

Phil Thomson
